# KINGSLEY KWAKU KODUAH

5134613901 | kingsleykoduah4040@gmail.com

## SUMMARY

- More than 10+ years providing data-driven solutions through Tableau, Power BI, SQL server, Hadoop, Alteryx, AWS Athena, Python, SSIS, Oracle, and Redshift.
- Around 7 years of rich experience in end-to-end implementation of Tableau and Power BI projects, along the lines of designing, developing, and enhancing complex Dashboards.
- Around 6+ years of experience comfortably meeting with Senior VPs, Directors, Project Managers to gather and analyze requirements.
- Over 6 years of hands-on experience designing clean and efficient Tableau Dashboards using advanced features, complex interactivity, and customized charts to meet requirements.
- Highly skilled in Tableau performance tuning, troubleshooting existing dashboards and performance management.
- Well versed in using Row Level security (data security), authentication and permissions to secure dashboards.
- Expert in evaluating data models and building ETL processes to automate reporting processes.
- Strong understanding of data systems (BI analytics, data blending, data warehousing, data ETL, etc.) on process automation and standardization.
- Well versed in developing and tuning complex SQL queries for enterprise reports and dashboards.
- Hands-on experience administering users, user groups, and scheduled instances for reports in Tableau.
- Rich experience creating documents like BRD, FRD, user stories, user manuals, and design manual.
- Fully versatile and willing to take on new challenges across different projects and technologies.

## EDUCATION

**Miami University** — Oxford, Ohio
MSc. Mathematics — August 2022 - July 2024

**Kwame Nkrumah University of Science and Technology** — Kumasi, Ghana
BSc. Mathematics — August 2016 – September 2020

## TECHNICAL/BUSSINESS SKILLS

| | |
|---|---|
| **RDBMS** | SQL Server, MySQL, Hadoop, Impala/HIVE, Oracle, Teradata, Netezza |
| **Reporting Server** | Tableau, OBIEE, Actuate |
| **Reporting Tools** | Tableau, Actuate suite, BIRT, MicroStrategy& OBIEE Alteryx, and Python |
| **Enterprise Environment** | Maximo, Business Objects, MSBI Stack (SSIS, SSRS & SSAS) |
| **ETL** | Alteryx, SSIS, Informatica 8.1.1/8.6.1 & Objects Data Integrator |
| **Microsoft Office** | MS Word, MS Excel, MS. PowerPoint, MS. Access, MS. Outlook |

## PROFESSIONAL EXPERIENCE

**Bank of New York Mellon** — Greenwich Street, New York
*Tableau Developer* — January 2024 - Present

- Closely engage with business units to capture requirements and define KPIs, while converting complex challenges into technical specifications that deliver impactful solutions aligned with strategic objectives and measurable outcomes.
- Identify inefficiencies by conducting extensive gap analyses and propose improvements supported by data-driven evidence, while presenting findings to leadership using clear narratives, visual storytelling, and actionable recommendations that influence decision-making.
- Designed and delivered advanced Tableau dashboards leveraging complex calculations, parameters, and interactive filters, and optimized workbook performance using best practices and other performance optimizing tools.
- Develop interactive Power BI dashboards that complement Tableau solutions and provide cross-platform reporting capabilities, while integrating multiple data sources with scheduled refreshes, gateways, and automated workflows

- Leverage advanced DAX measures, calculated columns, and hierarchies to enrich analytical depth and embed complex business logic directly into reports, while establishing governance standards, documentation, and training programs to drive consistent adoption across the enterprise.
- Designed effect security measures including row-level security, permissions, and version control to safeguard sensitive information.
- Standardized design templates and visualization guidelines to maintain consistency across enterprise reporting solutions, while mentoring junior developers through structured training sessions, peer reviews, and ongoing coaching to elevate team-wide Tableau expertise.
- Wrote and maintain complex SQL queries, stored procedures, and views to support robust analytics pipelines, while applying indexing, partitioning, and execution plan analysis to optimize performance and reduce system overhead in high-volume environments.
- Build reusable SQL libraries and scripts to streamline reporting processes and reduce duplication, while implementing monitoring and alerting systems to proactively track query performance, database health, and potential bottlenecks before they impact business operations.
- Design and proactively monitored ETL workflows that extract, transform, and load data from diverse sources into centralized repositories, while automating pipelines using Alteryx and Python frameworks to reduce manual intervention and improve efficiency across reporting ecosystems.

**American Express** Salt Lake, Utah

*Tableau Developer* May 2021-November 2023

- Design and develop visuals and dashboard to convey the story of the data.
- Lead requirement analysis effort to ensure requirements are specific, measurable, and realistic.
- Collaborated with SMEs, Directors, and business-side stakeholders to develop KPIs and reports and ensures performance and risk mitigation.
- Skillfully and successfully tuned many dashboards using Tableau best practices and performance tuning principles.
- Expertly employed complex Row Level Security using Tableau server and the database.
- Created and published data sources to Tableau server to be used by multiple workbooks.
- Designed ETL process to extract data from multiple source systems and publish to Tableau server.
- Designed and evaluated data modes to boost reporting process and increase performance.
- Comfortably created design documents, user manuals, and mockups.
- Performed extensive data analysis, data validation, data mapping/design, by accessing multiple sources to discover patterns and data suitability for reporting.
- Expertly tuned complex workbooks and large datasets for optimal Tableau performance and maintainability.

**Sheridan Healthcare** Atlanta, Georgia

*Tableau Developer* February 2019-March 2021

- Successfully collaborated with multiple teams and worked multiple data sources to develop new dashboards, migrate reports from other tools (Congnos, Power BI, and MicroStrategy), and enhance existing dashboards.
- Utilized advanced features in Tableau like Extensions, APIs (JavaScript and Python), customized charts, analysis action, calculations, parameters, background images to enhance user's experience.
- Analyzed requirements and data to determine suitability of data, discover patterns, and relevance of requirements in relationship to the overall business goals.
- Created clean dashboards with good performance, strong security (using Row Level Security), and effective interactivity.
- Successfully improved Performance & tuning of Data extracts for Tableau and SQL scripts used in extracts.
- Scheduled extract refresh (Incremental and Full refresh) using Tableau server, Alteryx, and Python.

**eBay** Draper, Utah

*Senior Tableau Developer* May 2017-February 2019

- Effectively collaborated with various SMEs and business-side stakeholders to analyze and prioritize requirements and developed dashboards that address key business issues.
- Performed extensive GAP analysis in the project as there were numerous ‘As-Is’ and ‘To-Be’ conditions. Utilized advanced features in Tableau like Extensions, APIs (JavaScript and Python), customized charts, analysis action, calculations, parameters, background images to enhance user’s experience.
- Created database objects such as tables, views, procedures, triggers, and functions using T-SQL to provide definition, structure and to maintain data efficiently.
- Created action filters, parameters and calculated sets for preparing dashboards and worksheets in Tableau.
- Expertly used advanced chart visualizations in Tableau like Dual Axis, Box Plots, Bullet Graphs, Tree maps, Bubble Charts, Waterfall charts, funnel charts etc., to assist business users in solving complex problems.
- Scheduled extract refresh (Incremental and Full refresh) using Tableau server, Alteryx, and Python.
